

Capabilities Statement

IGS Corporation is a proud woman and minority owned company seeking federal contracting opportunities. With over 30 years of Business IT experience in primarily Fortune 100 companies, ranging from Global Logistics & Retail, to Consumer Goods and Software as a service, we can lead or supplement your digital transformation. We specialize in business architectural analysis & design, software product management, accounting, order management and fulfillment, logistics and supply chain solutions. We have a developing practice in Data Analytics, No Code AI and Machine Learning, building Data Science Solutions. We serve most phases of the software development lifecycle from exploration and requirements definition through to testing, training and deployment, including post go-live operations. We can assume a variety of roles ranging from representing the stakeholder leading strategic technical projects to supplementing the team in providing written documentation & testing.
